Jyoti Singh

jyotisinghd106@gmail.com| LinkedIn | Github | Leetcode

Summary

B.Tech student in Computer Science (AI & DS) with a strong foundation in Data Structures & Algorithms, solving over 65+ Leetcode problems with a current contest rating of 1541. Skilled in full-stack web development, including frontend development with React.js and Tailwind CSS, and backend development using Node.js, Express.js, and RESTful APIs. Passionate about building scalable web application, writing clean and efficient code, and continuously learning new technologies to solve real-world problems.

Education

ITM SLS baroda university — July 2024-July 2028

B.tech in computer Science(AI and Data science) — CGPA: 8.44

Experience

Naugaya Technology Pvt Ltd | Full Stack & React Native Developer Intern — **Feb 2026 – Present**

- Developed and maintained full-stack web applications using the **MERN stack** (MongoDB, Express.js, React, Node.js).
- Built and high-performance, cross-platform mobile applications using **React Native**.

Projects

Portfolio Website: HTML, CSS, javascript, Vercel, Github — Github | Live website

- Designed and developed a personal portfolio website to showcase projects, skills, and professional background.
- Utilized javascript to create a modern, component-based, and single-page application.
- Ensured a fully responsive design for optimal viewing on all devices.

FlavorHut Recipe Sharing Platform — Github | Live website

Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Vite, JWT, Google OAuth, GitHub, Vercel,Render

- Built a full-stack recipe sharing platform with authentication and admin roles.
- Implemented responsive UI, recipe search, category filtering, and ratings.
- Integrated JWT + Google OAuth, email verification, and role-based access control.
- Developed REST APIs for recipes, users, and image uploads (Multer).

CanteeriaApp:

Techonologies:-React Native, Expo, Node.js, Express.js, MongoDB, Socket.io, Render, REST APIs — Github

- Developed a cross-platform mobile app for canteen pre-ordering (Android/iOS).
- Built a real-time Kitchen Dashboard for order tracking using Socket.io.
- Created admin interface for menu management and order monitoring.
- Implemented secure authentication and REST APIs for high-volume orders and build it on expo.

Neon Horizon | Decentralized NFT Ticketing Platform — Github | Live website

Technologies: Solidity, Foundry, HTML5, JavaScript (Ethers), Etherscan, Sepolia Testnet, OpenZeppelin, MetaMask

- Developed and deployed ERC-721 NFT ticketing smart contract on Sepolia Testnet.
- Implemented automatic payment routing using smart contract logic.
- Built frontend to interact with smart contracts via MetaMask.
- Secured admin functions using OpenZeppelin access control.

Skill Set

Languages: Python, C++, Javascript

Frontend: HTML, CSS, React.js, tailwind CSS

Backend: Node.js, express.js, RESTful API's

Databases: MongoDB

Tools: Git, Github

AI/ML: OpenCV, Pandas, Numpy, Matplotlib

Achievements

- 5th Place out of 75 teams in *CodeClash* Coding Contest –ITM College
- Solved 65+ problems on LeetCode, regularly participating in contests
- Current LeetCode Contest Rating: 1541.
